

Assignment 1

CISC 3325

- I. Search on-line to find an example of a recent computer data or security breach. Provide the URL and a short description of the breach giving details of who was affected, when and where it occurred.

- II. Exercise 19, Chapter 1: A program is used by a company to allow customers to order products on-line:
 - a. Who might want to attack the program?
 - b. What type of harm could occur?
 - c. List some vulnerabilities that the program might have.

- III. Exercise 13, Chapter 2: Describe a situation where a weak but easy-to-use password may be adequate.
