CSC84400: Privacy, Security and Usability

Homework1:

Find two news articles or research papers that report on privacy concern based on surveys conducted within the past two years. For each survey explain:

- What population was surveyed?
- How was the survey conducted?
- On what aspects of privacy thus this survey focus?
- What specific questions were asked? (If you can't find the complete survey or it is many questions, describe the main questions on which the results are based.)
- What were the most important conclusions?
- Critique the survey method -- What was good about this approach and what could be improved? In what ways might these results be biased?
